

Scented Storm Jar

Gather beautiful, scented natural materials to create a storm jar

How will your storm jar smell? Will it be earthy, woody, fresh, spicy, sweet or tangy?

You will need:

- An empty jar
- Water
- Natural scented materials
- A stick to stir the mixture

Go for a walk and collect natural scented materials.

Fill a jar 3/4 full of water.

Put your scented materials into your jar.

Using your stick, create a swirling storm by stirring your scented mixture.

Autumn is the perfect time to get outside and to be creative with natural materials. There are so many colours, shapes and textures to choose from!

You could create leaf kebabs, mobile decorations or crowns. Or, you could use leaves and other natural materials to create firework and bonfire scenes.
